CV Customer support

Alex Taylor Test

Customer Support Specialist for SaaS products

Remote in Europe | Open to worldwide remote teams | alex.test@example.com

Entirely fictional profile created to test Babwork recommendations. Every position and organisation below is invented.

Profile

Customer support specialist with three years of fictional experience helping users of SaaS products. I am looking for a remote customer service, technical support or customer success role. I communicate clearly, investigate problems and follow customer issues through to resolution.

Skills

Customer support, customer service, customer success, Zendesk, Intercom, Freshdesk, CRM, email support, live chat, troubleshooting, ticket management, knowledge base writing and customer onboarding.

Professional experience

2024 to 2026 | Customer Support Specialist | Cloud Demo

Answered email and live chat questions about a fictional SaaS platform. Investigated login and billing issues, reproduced reported bugs and escalated technical cases to engineers. Maintained help centre articles and supported new customer onboarding.

2023 to 2024 | Customer Service Assistant | Example Services

Managed customer enquiries, organised support tickets and documented common solutions. Used CRM records to track conversations and collaborated with a remote support team.

Example project

Built a fictional help centre with clear onboarding guides and troubleshooting instructions. Organised ticket categories in Zendesk and prepared customer service response templates.

Education

2023 | Fictional diploma in business communication | Demo Institute

Languages and availability

Fluent English and professional French. Available for full-time or part-time remote work. Comfortable collaborating across European time zones.
